

Installing Anchor Stakes

Drill out the top hole in all of the 24" stakes to 1/4". Place the twenty-six 24" long stakes around the stationary walls in the approximate locations shown in figure 4 and the pictures below.

At all of the stake locations drive the stakes in the ground on the inside of the frame and attach the stakes to the frame using one #14 STS at each stake as shown. At the doorway install a 6' length of 1"X6" as shown.
