

### **Wooden Wheel Channel**

Using wood provided, assemble the wheel channel per the (WHEEL CHANNEL DRAWING) below. Also refer to the pictures of the wheel channel.

Attach the 2X4s to the 4X8s using 3" deck screws.

Place the wheel channel in the hangar and center it on the hangar centerline. Place the back end of the wheel channel 30" from the back hangar wall.

Secure the wheel channel in place using 18" stakes. Place one stake on each side of the wheel channel 1 ft in from each end. Place one stake on each side of the wheel channel at 6 ft, 12 ft and 18 ft from the front end of the wheel channel.

Secure all of the stakes to the wheel channel using 1 5/8" deck screws.

The WHEEL CHANNEL located on the hangar centerline
