

Attaching The Corner Pieces

There are two corner pieces that have only one flange. These are the wingdoor wingtip corner pieces. Install these corner pieces on the wingtip end of the wingdoors. When the doors are closed these pieces fit between the wingtip wall and the wingtip post.

The two 36 1/2" corner pieces go on the front corners of the nosehouse.

Install the remaining corner pieces. Install two on the back of the tailhouse and one on the back of each winghouse. Six screws attach the tailhouse corner pieces and 4 screws attach the winghouse corner pieces.
